PITCH DECK

COMMON FEATURES OF CURRENT GAMEFI PROJECTS

- ✦ The adaptation of NFT to represent in-game items or the use of crypto as in-game currency.
- ✦ Require a private server to execute logic and archive records or calculations throughout the gaming process.
- ✦ The beneficial properties of blockchain as decentralization, transparency, and security are **underutilized**.

HIGH GAS FEE

- ★ The **very high** gas fee of the Ethereum blockchain, on which most of these Dapps are built, has increased the total cost per transaction.

PRICE PREDICTION

Players make guesses about the future value of a digital asset. A mathematical model is used to determine the accuracy of a prediction, which influences the size of the reward. In general, the closer the forecast is to the actual outcome, the greater the benefits.

The screenshot shows a user interface for a price prediction game. At the top, the title "Choose Crypto" is displayed. Below it, two buttons are visible: "BTC" (highlighted in purple) and "SOL" (dark grey). The interface is divided into two columns. The left column is labeled "Price on Monday" and shows a value of "\$48,486,326". The right column is labeled "Present price" and shows a value of "\$49,126,479" in green. Below this, the title "Place your bet" is shown. Underneath, there are three input fields: "Your prediction" with a value of "\$ 0.00", "Your bet" with a value of "0.00 %", and "Minimum bet: \$5" with a value of "0.00". To the right of these fields, the text "USDC" is displayed. A green "Submit" button is located at the bottom right of the form.

Choose Crypto	
BTC	SOL
Price on Monday	Present price
\$48,486,326	\$49,126,479

Place your bet		
Your prediction	Your bet	Minimum bet: \$5
\$ 0.00	0.00 %	0.00
		USDC
		Submit

PREDICTION MARKET

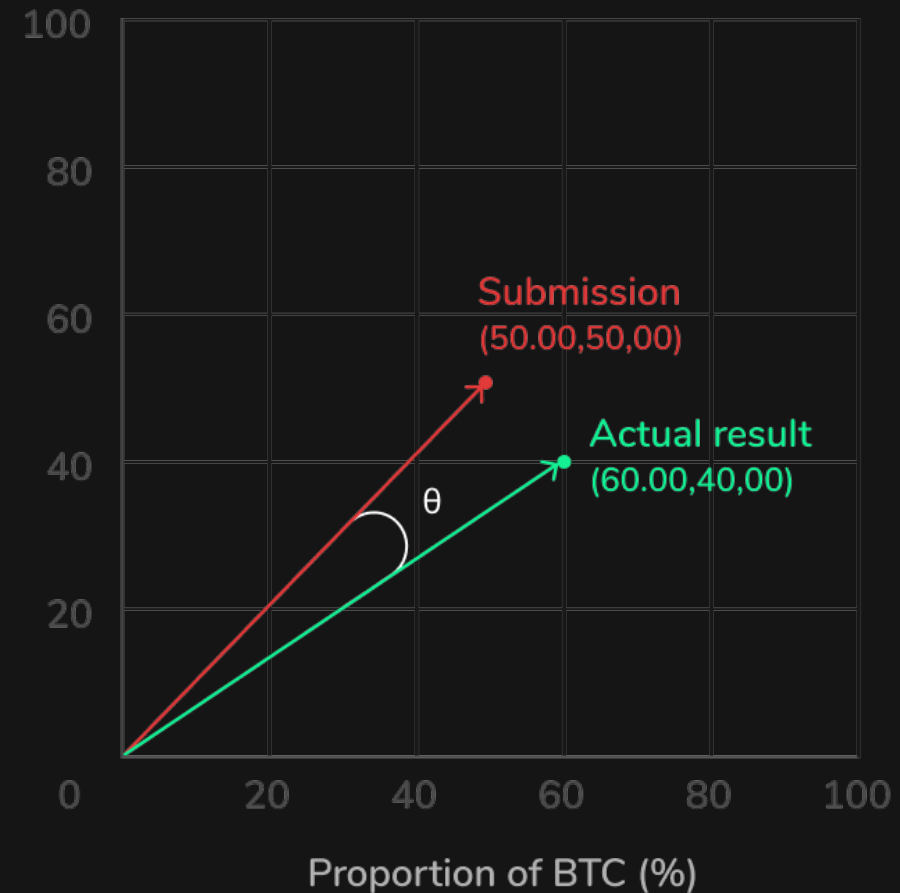

The applied math

Your prediction and the actual price result will be represented by 2 vectors (S & A).

Your score depends on the angle θ formed by 2 vectors S and A. The smaller θ , the higher score you get.

We can apply this method to various prediction markets.

Proportion of USD (%)

UP & DOWN

Participants in this game will wager on whether the SOL/USDT exchange rate will rise or fall during a certain period.

The total stake money constitutes the prize pool, which will be awarded proportionately to each participant who makes an accurate prediction.

We can apply this strategy to various binary-options markets.

The screenshot displays a trading interface with a dark theme. At the top, a clock shows 06:48 and a progress bar is visible. Below the clock, there are three market panels:

- Expired #12:** Shows a green 'Up' button with a 2.33x Payout. The Last Price is \$0.0325 and the Locked Price is \$3.521. The Prize Pool is 100,000 LMF. A green arrow indicates a bet of \$0.003. A grey 'Down' button with a 1.82x Payout is also visible.
- LIVE #14:** Shows a purple 'Up' button with a 2.33x Payout. The Last Price is \$0.0325 and the Locked Price is \$3.521. The Prize Pool is 100,000 LMF. A red arrow indicates a bet of \$0.003. A red 'Down' button with a 1.82x Payout is also visible.
- Later #16:** Shows a grey 'Up' button. The entry starts at ~06:48. A grey 'Down' button is also visible.

In the center, there is a 'Set my bet' section with a green 'Up' button. It shows 'Your balance: 1000 LMF' and a bet amount of '0.00'. A 'Max LMF' button is also present. Below this, a warning message states: 'You won't be able to remove or change your position once you enter it.' A large green 'Confirm bet' button is at the bottom.

JACKPOT LOTTERY

A chance-based game in which players have the opportunity to win massive rewards by buying lottery tickets. It is straight-forward and equitable, and players have no constraint to participate except being able to pay for the tickets.

The game needs a trustworthy and transparent random method.

Round 170

RANDOM ON SOLANA

“Chainlink VRF (Verifiable Random Function) is a provably fair and verifiable random number generator that enables smart contracts to access random values without compromising security or usability.”

Currently, Chainlink has not deployed VRF on Solana.

Because VRF is open-source, we built the first random solution on Solana based on VRF.

THE DAPP GAMES HUB ON SOLANA

We provide tools:

- ✦ Prediction market
- ✦ Binary-options market
- ✦ Random function on Solana

**Other developers can build Dapp Games
(via these tools or not) and deploy them
on Lamas Finance.**

NFT COLLECTIONS

Four NFT collections corresponding to the four games.

To complete an NFT collection, players have to collect all six different pieces with the same version of rarity.

Users can receive NFT by participating in Lamas's games

NFT REWARD

Each week, a “theme-of-the-week collection” is randomly selected. Players who own a completed collection that match the theme collection will have a chance to redeem it for a valuable reward.

The estimated value of rewards

1-star collection:

100 LMF - 500 LMF

2-star collection:

500 LMF - 2000 LMF

3-star collection:

2000 LMF - 10000 LMF

BURN NFTS TO CREATE NEW NFT

Users can burn some cards of low rarity to create a new random card whose rarity is higher than or equal to the highest rarity of the cards exchanged.

NFT MARKETPLACE

Users can find the NFT pieces they are looking for in the Lamas market. Sellers are responsible for paying tax for each transaction, which is 5% of the NFT's value.

DEFI KEY FUNCTIONS

Farming ✨

Earn interest with extremely high APR.

Swapping ✨

Allows users to swap and add liquidity for trading pairs: LMF/USDC and LMF/SOL.

Lamas Treasury ✨

A fantastic treasury is ready to be given to all of our winners.

Staking ✨

Unlock Lamas treasury as well as governance rights and receive tax discount.

FARMING

Users add liquidity and then stake LP tokens to earn interest with extremely high APR. Farming profits are from Lamas Treasury.

In the initial stage, there are two farming pairs provided on Lamas Finance: LMF/USDC, LMF/SOL.

Swap Liquidity **Farm** Staking

Farms

Stake your LP tokens and earn token rewards with High APR.

Q **Active** End

 RAY - SRM	Staked 1,338.4	ⓘ APR 1,647%	TVL \$8,986,959	▼
 RAY - QUICK	Staked 0	ⓘ APR 321%	TVL \$8,986,959	▼
 RAY - LMF	Staked 300	ⓘ APR 600%	TVL \$8,986,959	▼

STAKING

Users can stake LMF to receive LMF with relatively high APR. In addition, participating in staking LMF provides users with two following benefits:

- ✦ *Get tax discount when playing games*
- ✦ *Governance rights*

Staked	APR	TVL
15,358	350.8%	\$13,986,959

LAMAS TREASURY

Lamas Treasury is a reward pool designed to reward users for playing games, collecting NFTs, and most notably partaking in Lamas Finance's DeFi functions like staking and farming.

Lamas Treasury will be initialized with 25% of the total LMF token supply. After that, the treasury will be maintained by the following revenue sources:

- ✦ *Taxes collected from games.*
- ✦ *Taxes on NFT transactions on Lamas market.*

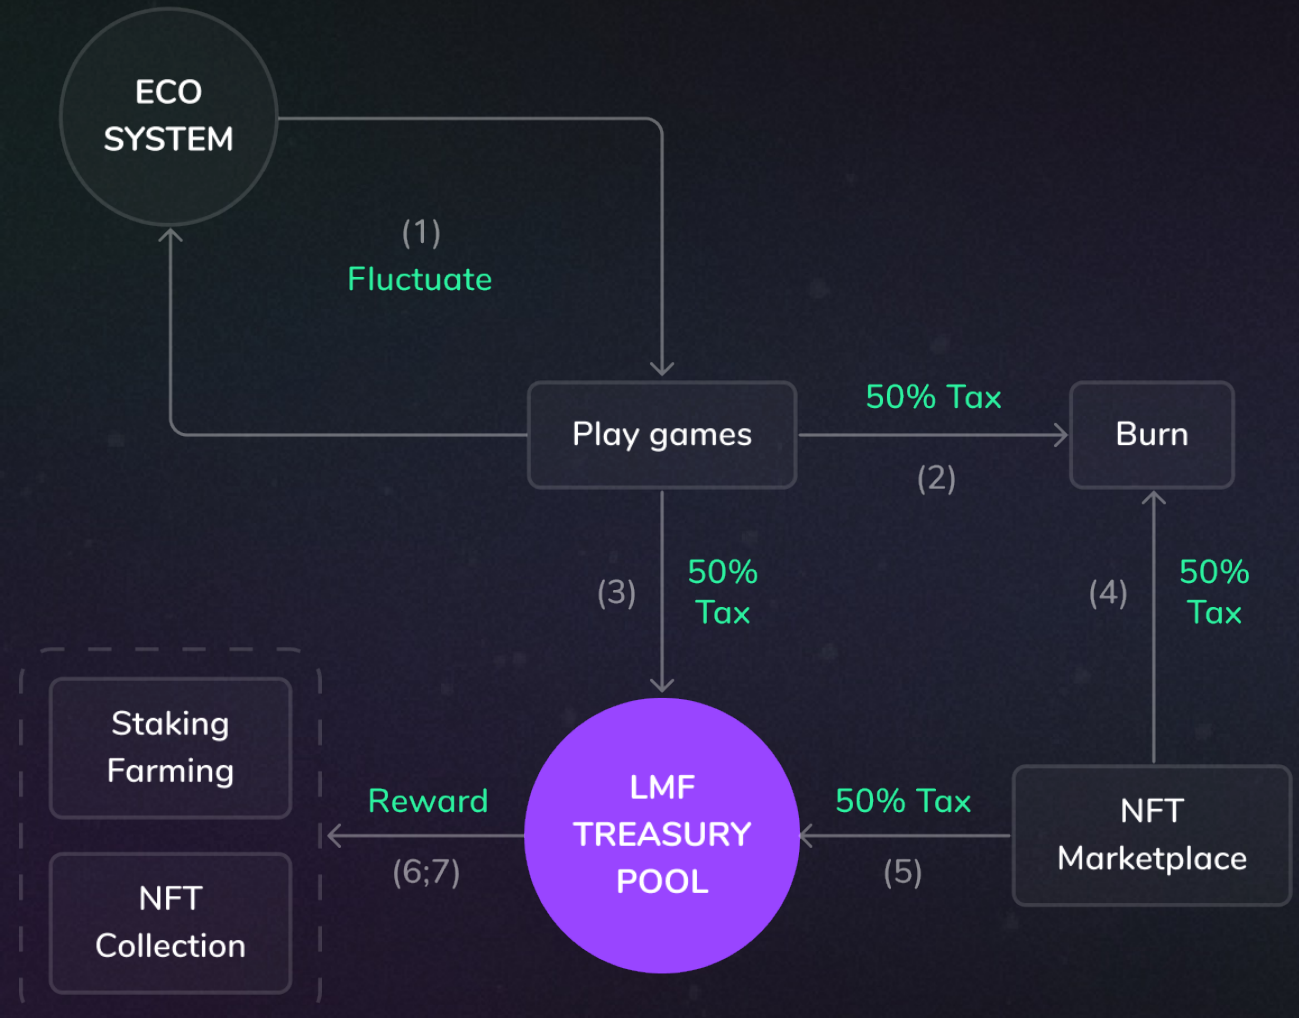

The Lamas Foundation Team will adjust the rewards for NFT redemption, staking, and farming such that no more than 10% of the Lamas Treasury is used to award users each month. The monthly revenue will compensate for this expense.

MONEY FLOW STRUCTURE

When participating games, users interact with the Ecosystem Pool (1). If they win, there will be a tax. This tax will be divided into 2 parts: burned (2) or remitted to Lamas Treasury (3).

NFT pieces collected can be traded and 5% of the transaction value will be taken for tax payment. This tax will be divided into 2 parts: burned (4) or remitted to Lamas Treasury (5).

The rewards for users who own completed NFT collections (6) and interest for stakers and farmers (7) will be allocated from Lamas Treasury.

LMF TOKENOMICS

KEY METRICS

Token Name: Lamas Finance

Ticker: LMF

Blockchain: Solana

Token Standard: Solana

Total Supply: 10,000,000 LMF

VESTING PLAN

- ✦ Team & Advisor: 6-month cliff, linear vest within the next 12 months
- ✦ Marketing & Community: 20% distributed in the first 1 month, the rest 80% will be distributed in the upcoming events within 12 months (from TGE)
- ✦ Listing & Liquidity: 30% at TGE for DEX listing, 70% for CEX listing
- ✦ Ecosystem: used for the game (fluctuating)
- ✦ Lamas Treasury: used for yield & incentives
- ✦ Private Sale: 10% at TGE, linear vest within the next 12 months
- ✦ Public Sale: 40% at TGE, 60% linear vest within the next 2 months

	TGE	01	02	06	07	12	15	18
TEAM & ADVISOR	-	CLIFF			LINEAR VEST - 12 MONTHS			
MARKETING & COMMUNITY	-	20%	80% DISTRIBUTED IN EVENTS					
LISTING & LIQUIDITY	30% DEX LISTING	CEX LISTING						
ECOSYSTEM (USED FOR THE GAME)	-	VARIABLE						
LAMAS TREASURY (REWARDS & INCENTIVES)	-	VARIABLE						
PRIVATE SALE	10%	LINEAR VEST - 12 MONTHS						
PUBLIC SALE	40%	LINEAR VEST 2 MONTHS						

ROADMAP

The third quarter of 2023

- ✦ Complete whitepaper & documents
- ✦ Launch official website
- ✦ Launch community & media
- ✦ Private sale
- ✦ Testnet for 2/4 games

The fourth quarter of 2023

- ✦ Whitelist and public sale
- ✦ Presale NFT
- ✦ Mainnet for 2/4 games
- ✦ TGE & DEX listing
- ✦ CEX listing
- ✦ Swap & add liquidity

The first quarter of 2024

- ✦ Testnet for 4/4 games
- ✦ Launch Farming & Staking
- ✦ Launch “Play to Earn NFT”
- ✦ Mainnet for 4/4 games

2024...

- ✦ Lending protocol
- ✦ Multi-chain support for all games
- ✦ Release new Dapp games

The second quarter of 2024

- ✦ Launch NFT Marketplace
- ✦ Launch “Burn NFT”
- ✦ Launch “NFT Reward”
- ✦ Governance function

The logo for Lamas Finance, featuring the text "Lamas Finance" in a white sans-serif font with a small orange star to the right of the word "Finance".

Lamas Finance

A large graphic consisting of a central point with numerous teardrop-shaped elements radiating outwards, resembling a sunburst or a stylized flower. The elements are in various shades of green and teal, with some being more opaque and others more transparent, creating a sense of depth and movement.
